## Economics

### **FX Reserves fell \$1bn in August**

International reserves of Kazakhstan declined in August by nearly \$1bn (2.6% MoM) to \$36bn, along with the net sale of \$850mn by NBK. The decline was offset by gold, which rose 13% MoM. The National Fund added \$1.6bn, a significant change compared to the gradual growth of the previous two months . The monetary base declined 10% as banks withdrew 30% of deposits with the NBK, or approximately \$2.3bn.

## Banks

### **Moody's confirmed Eurasian Development Bank ratings**

Moody's confirmed a long-term foreign currency rating of A3 and a short-term rating of P-2 of the Eurasian Development Bank. The bank was evaluated as a multilateral development bank with a dual nature as a financial institution and an international public-policy vehicle. As a result, the EDB's standalone strength was supported by shareholders, the governments of Russia, Kazakhstan, Armenia, Belarus, and Tajikistan. The member-states supported the rating in two ways: by explicitly granting the Bank a preferred-creditor status on the territory of its member states and by extraordinary support believed to be available in the form of capital injection from shareholders in case of financial difficulties.

The EDB was founded by Russia and Kazakhstan in 2006 with a purpose of facilitating development and growth member states economies and promoting trade and integration through investment. The Bank's charter capital exceeds \$1.5 billion.

The bank's loan portfolio almost doubled to \$840 million at end-December 2010 from its level two years prior. As of 30 June 2011, EDB had invested in 42 projects with 36 other projects in the pipeline, representing a total of \$2.7 billion worth of planned lending over the next four years.

## **Oil and gas**

### **KMG EP in 1H2011: revenue grew 35%**

According to 1H2011 results published last week, KMG EP's revenue grew to \$2.7bn, up 35%YoY, largely due to an increase in oil price (from \$63.47 per barrel to \$90.03 per barrel) which offset production losses. Consolidated production was down 3%YoY to 6,311 thousand tons (258 kbopd). The loss was concentrated at the company's core assets, UzenMunaiGas and EmbaMunaiGas, where production declined 5% to 4,115 thousand tons (167 kbopd) because of a strike. KMG EP revised production estimates for 2011 to 800 thousand tons, 6% less than planned previously. Profit at \$783mn was up 14%YoY. Capex rose 75%YoY to \$311mn, mainly due to a planned increase in production drilling from 213 wells in 2010 to 239 wells in 2011 and an increase in exploration works. Net cash position on June 30 was at \$4.1bn, up from \$3.9bn at the end of 2010.

**Our view.** 1H results were largely in line with the earlier reported production losses and observed price increases. We have KMG EP under research coverage. The target price is currently under review.

*Miramgul Maralova*

### **Tethys completes drilling Kalypso exploration well**

Last week, Tethys Petroleum announced initial results of Kalypso exploration well. While drilling, the company observed indications of hydrocarbons in both geologic levels: Carboniferous and Jurassic. The electric logs indicate more than 100 m of hydrocarbon bearing zones in Carboniferous geologic level. Tethys will start testing on both levels after getting approval from the authorities, which could take about two months. Production from similar limestone intervals in the nearby fields required acidization and fracture stimulation to achieve optimal production performance.

**Our view.** Indication of hydrocarbons at the first exploration well is marginally positive for the company. We do not expect immediate share impact until the testing results become available, which we estimate at the end of the year. We have Tethys Petroleum under research coverage with a 12-month target price of CAD1.3 (GBp86) and a Buy recommendation.

*Miramgul Maralova*

### **Kazakhstan starts building gas pipeline to China**

Last week, KMG NC said it started building gas pipeline to China. Routed through Beineu-Bozoi-Shymkent, the pipeline will bring gas from West Kazakhstan to 1.5 mln people of South Kazakhstan before connecting to Chinese consumers. The National Company plans to build the first section of the pipeline from Bozoy to Shymkent with an annual throughput of 6bn cub. m. per year by the end of next year. The second section from Beineu to Bozoi will expand capacity to 10bn cub. m. and will be built in 2015-2016. Beineu-Bozoi-Shymkent will connect to Central Asia-China pipeline that carries the natural gas from Turkmenistan via Uzbek and Kazakh territory to China's Xinjiang region.

**Our view.** We believe that building of a gas pipeline is a positive for Kazakhstan's gas producers. The main effects are through market expansion and higher selling prices, for both domestic and international sales.

*Miramgul Maralova*

## Metals and mining

### ***Mashkevich bids for ENRC chairmanship***

According to The Guardian newspaper, three weeks ago Alexander Mashkevich, one of the founding shareholders of ENRC, filed an application with the U.K. Listing Authority seeking clearance for him becoming the Chairman of the Board of Directors. Although his candidacy may be supported by the other founding shareholders, Government of Kazakhstan and Kazakhmys, who cumulatively own 83% of the company, the move is opposed by some minority shareholders and the British non-executive independent directors on ENRC Board.

Following the removal from the BoD of two British non-executive directors, who accused the Board of being dysfunctional because of the excessive interference of the founding shareholders, ENRC launched a corporate governance review whose results are due later this month. ENRC shares lost almost 20% since the boardroom spat in June due to combined effects of the corporate governance issues and the global economic slowdown.

**Our view.** In the short-term, the news is negative for the stock as it may provoke further selling by minority shareholders. Yet, the jury is still out regarding the longer-term effects of the possible formalization of Mr. Mashkevich's role in the company. On one hand, Mr. Mashkevich becoming the ENRC Chairman may indeed increase the corporate governance discount. On the other, this move may be accompanied by an increase in the number of non-executive independent directors and the other measures aimed at compensating the greater influence of the founding shareholder.

*Mariyam Zhumadil*

### ***Ivanhoe Mines: Mongolia wants bigger stake in Oyu Tolgoi***

A group of Mongolian lawmakers demanded that the investment agreement governing the operations at Oyu Tolgoi be revised, reported Chinese news agency Xinhua on September 7. The legislators want to raise the country's current stake of 34% and demand higher taxes on the mining companies.

**Our view.** The news is bad for Ivanhoe Mines, but just how bad is not yet clear. Mongolian government signed the current Oyu Tolgoi investment agreement in October 2009. It promised the miners a corporate income tax of 25%, dividend tax of 10% and 5% royalty. Ivanhoe Mines and Rio Tinto were responsible for project financing and could claim back 10% of capex investments as tax credits.

We believe that the tax increase in the investment agreement is unlikely, as taxes specified for Oyu Tolgoi are the same as for other mining companies operating in the country, except for the dividends tax, which is half as large as for the other projects. The main threat to the current shareholders of Oyu Tolgoi is the potential equity dilution, if the lawmakers succeed. Mongolian legislation governing the minerals law remain fluid, driven by increased environmental awareness of the population and assertiveness of the politicians. Last year Mongolia revoked some 250 gold exploration licenses and put several development-stage projects on hold.

We do not yet have Ivanhoe Mines under formal research coverage.

*Mariyam Zhumadil*

**Kentor Gold posts update on Burnakura project**

According to an operational update released by Kentor Gold on September 9, Burnakura project is on track, and production at the mine will start by mid-2012. Initially, the output is planned at 250kt of ore a year, with a future expansion target of 500ktpa. The exploratory drilling program is underway, and the company expects it to result in an increase in Burnakura resource estimate. We do not expect material share price impact, as the announcement is largely neutral for the stock.

Kentor Gold is a gold-copper exploration and development company with a portfolio of projects in Kyrgyzstan and Northern Australia. Inferred resources of the company's Australian projects are estimated at 516koz of gold Burnakura, 203koz of gold for Gabanintha, 113kt of copper and 7.6Moz of silver at Jervois. We currently do not have Kentor under formal research coverage.

## International bonds

Over the past week the yields for most Eurobond issues changed insignificantly (by 30-50 bps), except for banks, whose yields tended to increase. The restructured banks posted largest yield increases, with YTM bid and ask quotes for BTA'2025 and BTA'2018 rising by 159-160bps and 380-276bps respectively. The yields on Alliance'2017 increased by 72-111bps.

## International Stock Exchanges

Over the past week international indices negatively responded to fiscal and financial conditions in Europe. Almost all of the large-caps in our international equities list were down, except Centerra Gold (+6.5%), Halyk Bank (+1.3%) and Ivanhoe Mines (+0.6%). The mid- and small-caps were, as always, volatile. The largest movers were: Chagala Group (+44.4%), Central Asia Resources (+32.6%), Roxi Petroleum (+28.5%), Caspian Oil&Gas (+22.2%), Kentor Gold (+12.2%), Hunnu Coal (+10.8%), Kazakhstan Kagazy (-20%), Caspian Energy (-16.7%), Alhambra Resources (-15.6%).

This document is for information purposes only. Opinions and views expressed in this document do not necessarily represent the opinions and views held by Halyk Finance, or other subsidiaries of Halyk Bank. The differences of opinion stem from different assumptions, sources information, criteria and methodology of valuation. Information and opinions expressed herein are subject to change without notice; and neither Halyk Finance, or Halyk Bank, or any of its subsidiaries or affiliates are under any obligation to keep them current.

This document is not an offer or an invitation to engage in investment activity. It cannot be relied upon as a representation that any particular transaction necessarily could have been or can be effected at the stated price. This document does not constitute an advertisement or an offer of securities, or related financial instruments. Descriptions of any company or companies or their securities or the markets or developments mentioned herein are not intended to be complete. Views and opinions expressed in this document cannot substitute for the exercise of own judgment and do not attempt to meet the specific investment objectives, financial situation or particular needs of any specific investor.

The information and opinions herein have been arrived at based on information obtained from sources believed to be reliable and in good faith. Such sources have not been independently verified; information is provided on an 'as is' basis and no representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness, reliability, merchantability or fitness for a particular purpose of such information and opinions, except with respect to information concerning Halyk Finance and its affiliates.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. Options, derivative products and futures are not suitable for all investors and trading in these instruments is considered risky. Past performance is not necessarily indicative of future results. Foreign-currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or the price of, or income derived from, the investment.

Halyk Finance and its affiliates, directors, representatives, employees, or clients may have or have had interests in issuers described herein. Halyk Finance may have or have had long or short positions in any of the securities or other financial instruments mentioned herein at any time and may make a purchase and/or sale, or offer to make a purchase and/or sale, of any such securities or other financial instruments at any time, as principal or agent.

Halyk Finance and its affiliates may act or may have acted as market maker in the securities or other financial instruments described herein, or in securities underlying or related to such securities. Employees of Halyk Finance or its affiliates may serve or have served as officers or directors of the said companies. Halyk Finance and its affiliates may have or have had a relationship with or have provided investment banking, capital markets, advisory, investment management, and/or other financial services to the relevant companies. Halyk Finance relies on information barriers to avoid the appearance of conflict of interests within Halyk Finance or in its relations with clients, other issuers, and external investors.

The information herein is not intended for distribution to the public and may not be reproduced, redistributed or published, in whole or in part, for any purpose without the written permission of Halyk Finance. Neither Halyk Finance nor any of its affiliates accepts any liability whatsoever for the actions of third parties in this respect. This information may not be used to create any financial instruments or products or any indices. Neither Halyk Finance, nor its affiliates, nor their directors, representatives, or employees accept any liability for any direct or consequential loss or damage arising out of the use of any information herein.
